GENERAL CUSTOMER INFORMATION ON PACKAGING AND REQUIREMENTS OF THE EU PACKAGING REGULATION (PPWR)

July 2026

Murrelektronik GmbH is preparing for the application of Regulation (EU) 2025/40 on packaging and packaging waste (the “Packaging and Packaging Waste Regulation” – PPWR).

The PPWR sets out requirements for packaging, including substance restrictions, packaging minimisation, recyclability, recycled content, labelling, as well as obligations relating to technical documentation and conformity assessment.

Based on the supplier declarations, material information and internal assessments available as of the date of issuance, Murrelektronik confirms that the packaging placed on the market by Murrelektronik in the European Union complies with the substance restrictions applicable from 12 August 2026 pursuant to Article 5 PPWR.

The underlying packaging data, material information and supporting documentation are continuously reviewed as part of our internal assessment, documentation and supplier management processes and are updated where necessary.

Murrelektronik is gradually evaluating the further requirements of the PPWR in accordance with their respective dates of application and incorporating them into existing processes. To the extent that delegated or implementing acts, harmonised standards or official interpretations are relevant for individual requirements, these will be taken into account where applicable.

Please understand that Murrelektronik cannot fully complete customer-specific external questionnaires, Excel files and extensive data templates on a blanket basis.

Technical documentation, internal assessments, supplier declarations, specifications, drawings, test reports and other confidential documents are not generally disclosed. Such documents will only be provided following a separate review and only where disclosure is necessary in individual cases and permissible under applicable legal, contractual and confidentiality requirements.

This customer information is based on the information available as of the date of issuance. It will be reviewed and, where necessary, updated in the event of significant changes to legal requirements or the underlying information.
